

Flooded Basement? Water Damage? Broken Pipe?

Steps You Must Take NOW To Prevent Further Damage!

- If a pipe, water heater or appliance is broken and leaking, locate shutoff valve and shut off water to house. This will prevent more water entering the house.
- AVOID HAZARDS! Be extremely careful of the deadly combination of water and electricity. Also, be cautious of slippery wet carpets and floors. Stay away from Raw Sewage backups, which contain nasty bacteria and can be harmful to your health.
- CALL 612-331-4454 for 24 Hour Emergency Services, from our IICRC Certified Water Damage experts. We'll get your home clean and dry as fast as possible, to return your life to normal!
- Prevent Damage - Wood furniture will leave permanent stains in carpet, so move it to an unaffected area if possible, or put foil under the legs until we arrive!

Don't Gamble with Your Home and Family's Health!

[Water Damage Restoration](#) is a complex process. An inexperienced company that rushes through the job can cause more harm than good by drying the surface of your structure while leaving moisture trapped inside the walls and floors. **This can lead to microbial growth that can adversely affect your health and that of your family.**

Fixing Water Damage NOW Prevents Mold Problems Later!

Done Right has the right equipment to dry any structure, and years of experience in Water Damage, Flood Cleanup, and Applied Structural Drying.
