

## Home Inventory Worksheet

Don't rely on your memory to keep track of your possessions. Create an inventory so you can know what's missing if you ever need to file an insurance claim.

Use this home inventory worksheet to record descriptions and estimated values of all your household possessions in the event you should ever need to file a claim with your insurance provider. Attach additional pages as needed. It's a good idea to record visual images of your home and possessions as well, preferably with a digital camera or camcorder. Store a hard copy of this worksheet along with the images in a safe place such as a bank safe deposit box. Keep digital copies of your worksheet and images on a USB drive, backup hard drive, or data storage website.
